PRODUCTS

- **Fire extension:** mapping the extent of burnt areas and active fires observed at a given time
- **Fire monitoring:** mapping the dynamics of the extension of burnt areas (new observations at a time step to be defined)
- **Fire severity:** assessment of fire intensity on vegetation
- **Fire impact:** Mapping of binary impact (affected / unaffected) or gradation of damage (up to 4 classes of damage levels, depending on feasibility) on infrastructure
- Other products [on request](#)

SERVICES

- [Rapid mapping](#) in urgent or standard mode
- [Risks and recovery](#) in standard mode
